FORMAMIDE

13194 Spectro Grade 1 pt 39.50

HCONH₂ F.W. 45.04
 Absorbance: UV cut-off: 265nm
 Appearance: Colorless liquid
 Melting Point: 0-3°C
 Refractive Index: $n_D^{20} = 1.4475 \pm 0.001$
 Ultraviolet absorbance (determined from
 265nm to 400nm in a 1.00cm cell against
 water as the reference liquid). Does not
 exceed the following optical densities:
 1.0 at 265nm 0.04 at 290nm
 0.2 at 270nm 0.02 at 300nm
 0.08 at 280nm < 0.01 at 310-400nm
 The spectral absorbance curve is smooth
 throughout the prescribed range with no
 extraneous peaks

IODINE CHLORIDE, MONO-				
1981	Reagent ACS	100 g	18.00	
	ICl F.W. 162.36	500 g	38.35	
	(Non-Mailable)			
	Insoluble matter	0.005% max.		
	Assay	I/Cl ratio is 1.10 ± 0.1		
	Suitable for use in Wijs Solution			
IODINE EOSIN				
	see Erythrosin B E-513			
IODINE GREEN				
	see Methyl Green M-295			
IODINE SOLUTION 1N				
So-I-78	Fisher CERTIFIED	1 pt	12.65	
	Standardized volumetrically at 25°C	6x1 pt, cs	60.60	
	against National Bureau of Standards			
	Arsenous Acid.			
	Normality	1.005-0.998		
IODINE SOLUTIONS				
	in fractional normalities below 0.1N which are not listed are available, 5 gal minimum quantity in pt, qt or gal glass. Price on request.			
IODINE SOLUTIONS				
	in various percentages up to 5% are available 5 gal. minimum quantity in pt, qt or gal glass. Price on request.			
IODINE SOLUTION 0.1N(N/10)				
So-I-86	Fisher CERTIFIED	1 qt	8.45	
	Standardized same as So-I-78	6x1 qt, cs	40.50	
	Normality	0.1002-0.0998		
IODINE SOLUTION 0.02N(N/50)				
So-I-92	Fisher CERTIFIED	1 qt	8.25	
	Normality	6x1 qt, cs	39.60	
		0.02010-0.01990		
IODINE SOLUTION CONCENTRATE N/10				
So-I-87	Fisher CERTIFIED	ea	6.50	
	Each bottle contains exact amount of 1N concentrate required to make 1 liter of 0.1N(N/10)(Iodine-Iodide)	6, cs	31.20	
	Standardized same as So-I-78			
	Normality	0.1005-0.0995		
IODINE SOLUTION, GRAM				
So-I-96	For staining bacteria	1 pt	3.85	
		6x1 pt, cs	18.54	
		1 qt	6.20	
		6x1 qt, cs	29.64	
IODINE SOLUTION, HANUS				
ΔSo-I-98	(Non-Mailable)	1 pt	9.50	
	A volumetric Standard Solution.	6x1 pt, cs	36.00	
	Used for Iodine Number determination.	1 qt	15.15	
	Normality	6x1 qt, cs	63.00	
		0.225-0.215		
IODINE SOLUTION Concentrated				
So-I-102	(Weigerts) Lugol	1 pt	6.95	
	Assay (As I_2)	6x1 pt, cs	33.30	
		5.0 ± 0.5%		
IODINE SOLUTION, WIJS				
ΔSo-I-106	(Non-Mailable)	1 pt	8.25	
	approx. N/5 For determination of Iodine absorption number in fats.	6x1 pt, cs	30.00	
		1 qt	12.80	
		6x1 qt, cs	51.90	
		1 gal	42.00	
		4x1 gal, cs	128.00	
IODINE STANDARD

 (Non-Mailable)
 Test condition for gas chromatography using electron capture detection: 1 Nanogram of heptachlor epoxide gives approximately half scale deflection on chromatogram.
 Solvent suitability: no interfering G.L.C. peaks greater than that given by 0.02 nanogram/ml of heptachlor epoxide, tested separately on 10% Dow 11 and 2% QF-1, each on Chromosorb W.
 Reference: F.D.A. Pesticide Analytical Manual Volumes I and II.

METHANOL 99.9 mol % pure
ΔA-936 (Methyl Alcohol)
 Fisher CERTIFIED

1 qt (1.6 lb)	7.00
6x1 qt, cs	24.00

CH_3OH F.W. 32.04
 (Non-Mailable)
 Meets ACS Specifications
 Gas chromatographic curve and ultra violet absorbance curve available for each lot on request.

METHANOL SPECTRANALYZED²

ΔA-408 (Methyl Alcohol)
 Fisher CERTIFIED ACS
 CH_3OH F.W. 32.04
 (Non-Mailable)

1 qt	7.30
6x1 qt, cs	25.50
1 gal	14.50
4x1 gal, cs	40.00

For use in the ultra-violet range.

Actual Lot Analysis Reported on Label

Appearance Clear
 Color (APHA) 5
 Water (H_2O) 0.10%
 Boiling Range Not more than 1.0°C
 Boiling Point $64.6 \pm 0.1^\circ\text{C}$
 Residue after Evaporation 5 ppm
 Solubility in Water Clear
 Acetone & Aldehydes Pass test
 (limit about 0.001% acetone)
 Acidity (as CH_3COOH) 0.002%
 Alkalinity (as NH_3) 3 ppm
 Substances Darkened by
 Sulfuric Acid Color pass test
 Substances Reducing
 Permanganate Color pass test

Optical Absorbance

Wavelength (nm)	maximum absorbance
210	0.80
220	0.35
230	0.20
240	0.10
260	0.04
270	0.02
280-400	0.01

Ultra-Violet absorbance curves for each lot are run against distilled water set at zero absorbance. Curves available on request.

1-METHYLAMINOANTHRAQUINONE	100 g	5.95
5680-P Practical M.P. 168-170°	500 g	18.35
$\text{CH}_3\text{NHC}_6\text{H}_3\text{COC}_6\text{H}_4\text{CO}$ F.W. 237.26		

METHYL m-AMINO BENZOATE	5 g	10.65
9938 Reagent M.P. 52-54°	25 g	36.30
$\text{NH}_2\text{C}_6\text{H}_4\text{COOCH}_3$ F.W. 151.17		

METHYL o-AMINO BENZOATE
see Methyl Anthranilate 159

METHYL p-AMINO BENZOATE	25 g	12.85
3403 Reagent M.P. 111-113°	100 g	38.85
$\text{NH}_2\text{C}_6\text{H}_4\text{COOCH}_3$ F.W. 151.17		

p-(METHYLAMINO)BENZOIC ACID	10 g	16.15
8122 Reagent M.P. 163-165°	25 g	34.10
$\text{CH}_3\text{NHC}_6\text{H}_4\text{COOH}$ F.W. 151.17		

METHYL AMINO CAPROIC ACID
see L-Leucine L-91

2-METHYLAMINOETHANOL	250 g	4.95
7051-P Practical M.P. -6 to -4°	1 kg	9.90
$\text{CH}_3\text{NHCH}_2\text{OH}$ F.W. 75.11		

METHYL AMINOPENTANOIC ACID
see L-Leucine L-91

p-METHYL AMINOPHENOL SULFATE
see Elon E-90

METHYL AMMONIUM CHLORIDE
see Methylamine Hydrochloride M-224

METHYL n-AMYL KETONE
see 2-Heptanone 218

METHYL Iso-AMYL KETONE
see 5-Methyl-2-hexanone 8327-P

N-METHYLANILINE	250 g	6.15
353-P Practical B.P. 81-82°/14 mm	1 kg	14.65
$\text{CH}_3\text{NHC}_6\text{H}_5$ F.W. 107.16		
97% min. by G.L.C.		
(Non-Mailable)		

METHYL ANILINE, Di-
see Dimethyl Aniline

METHYL ANISATE	100 g	12.90
1702 Reagent M.P. 49-51°	500 g	53.25
$4\text{-CH}_3\text{OC}_6\text{H}_4\text{COOCH}_3$ F.W. 166.18		

3-METHYL-o-ANISIC ACID	25 g	101.35
8873 Reagent M.P. 84-86°		
$3\text{-CH}_3\text{C}_6\text{H}_3\text{-2-OCH}_3\text{-1-COOH}$ F.W. 166.18		

5-METHYL-o-ANISIDINE
see 2-Methoxy-5-methylaniline 2506

m-METHYLANISOLE	100 g	17.90
638 Reagent B.P. 173-175°	500 g	73.35
$\text{CH}_3\text{C}_6\text{H}_4\text{OCH}_3$ F.W. 122.17		

o-METHYLANISOLE	100 g	14.60
163 Reagent B.P. 170-172°	500 g	56.95
$\text{CH}_3\text{C}_6\text{H}_4\text{OCH}_3$ F.W. 122.17		

p-METHYLANISOLE	100 g	16.05
636 Reagent B.P. 173-175°	500 g	64.05
$\text{CH}_3\text{C}_6\text{H}_4\text{OCH}_3$ F.W. 122.17		

9-METHYLANTHRACENE	1 g	10.80
7306 Reagent M.P. 78-80°	5 g	37.05
$\text{C}_6\text{H}_4\text{C}(\text{CH}_3):\text{C}_6\text{H}_4:\text{CH}$ F.W. 192.26		

METHYL ANTHRANILATE	100 g	6.90
159 Reagent M.P. 24-25°	500 g	23.05
$2\text{-NH}_2\text{C}_6\text{H}_4\text{COOCH}_3$ F.W. 151.17		

N-METHYLANTHRANILIC ACID	25 g	12.05
1170 Reagent M.P. 177-179°	100 g	35.60
$2\text{-CH}_3\text{NHC}_6\text{H}_4\text{COOH}$ F.W. 151.17		

2-METHYLANTHRAQUINONE	25 g	23.95
2039 Reagent M.P. 177-178°		
$\text{CH}_3\text{C}_6\text{H}_3\text{COC}_6\text{H}_4\text{CO}$ F.W. 222.24		

2-METHYLANTHRAQUINONE	250 g	12.00
2039-P Practical M.P. 173-176°	1 kg	38.00

p-METHYLBENZALDEHYDE
see p-Tolualdehyde 1174-P

N-METHYLBENZAMIDE	5 g	6.50
9568 Reagent M.P. 79-82°	25 g	15.65
$\text{C}_6\text{H}_5\text{CONHCH}_3$ F.W. 135.17		

METHYL BENZENE
see Toluene T-324

METHYL BENZENESULFONATE	100 g	20.80
5763 Reagent M.P. -5 to -3°		
$\text{C}_6\text{H}_5\text{SO}_2\text{OCH}_3$ F.W. 172.20		

α-METHYLBENZHYDROL
see 1,1-Diphenylethanol 8549

2-METHYLBENZIMIDAZOLE	100 g	17.40
2760 Reagent M.P. 177-178°		
$\text{C}_6\text{H}_4\text{NCHC}(\text{CH}_3):\text{N}$ F.W. 132.17		

5-METHYLBENZIMIDAZOLE	5 g	13.75
4575 Reagent M.P. 114-115°		
$\text{CH}_3\text{C}_6\text{H}_3\text{NHCH}:\text{N}$ F.W. 132.17		

3-(2'-N-METHYLBENZIMIDAZOLYL)-7-N,N-DIETHYLAMINOCOUMARIN
see Coumarin 30 11986

METHYL BENZOATE	1 pt (1.1 lb)	7.20
M-205 Fisher REAGENT	6x1 pt, cs	34.50
$\text{C}_6\text{H}_5\text{COOCH}_3$ F.W. 136.15	1 qt (2.3 lb)	13.45
Sp. Gr. at 25° 1.086-1.088	6x1 qt, cs	64.50

2-METHYLBENZOPHENONE	5 g	8.00
10058 Reagent B.P. 169-171°/18 mm	25 g	22.90
$\text{CH}_3\text{C}_6\text{H}_4\text{COC}_6\text{H}_5$ F.W. 196.25		

4-METHYLBENZOPHENONE	25 g	10.05
1112 Reagent M.P. 55-57°	100 g	27.60
$\text{CH}_3\text{C}_6\text{H}_4\text{COC}_6\text{H}_5$ F.W. 196.25		

METHYL-p-BENZOQUINONE	100 g	9.60
3520-P Practical M.P. 67-69°	500 g	31.85
$\text{O}:\text{C}_6\text{H}_3(\text{CH}_3):\text{O}$ F.W. 122.12		

2-METHYLBENZOTHAZOLE					
1853	Reagent M.P. 12-14° $C_6H_4SC(CH_3)_2N$ F.W. 149.22	100 g 500 g	13.35 50.45		
3-METHYL-2-BENZOTHAZOLINONE HYDRAZONE HYDROCHLORIDE					
8443	Reagent 95% min. by Titration $C_6H_4SC(:NNH_2)NCH_3 \cdot HCl$ F.W. 215.71	1 g 10 g	11.30 67.65		
2-METHYLBENZOXAZOLE					
982	Reagent M.P. 7-9° $C_6H_4OC(CH_3)_2N$ F.W. 133.15	25 g 100 g	7.80 18.75		
DL-α-METHYLBENZYL ALCOHOL					
798	Reagent M.P. 19-21° $C_6H_5CHOHCH_3$ F.W. 122.17	250 g 1 kg	7.40 19.55		
N-METHYLBENZYLAMINE					
9361	Reagent B.P. 57-58°/5 mm $C_6H_5CH_2NHCH_3$ F.W. 121.18	10 g 25 g	10.80 20.65		
DL-α-METHYLBENZYLAMINE					
3972	98% min. by G.L.C. Reagent B.P. 77-79°/14 mm $C_6H_5CH(CH_3)NH_2$ F.W. 121.18 $n_D^{20} = 1.5268 \pm 0.0005$	25 g	10.70		
DL-α-METHYLBENZYLAMINE					
3972-P	Practical B.P. 74-77°/13 mm	100 g 500 g	10.70 41.95		
METHYLBENZYLANILINE					
see N-Methyl-N-phenylbenzylamine 160					
METHYL BORATE

MOLECULAR SIEVES Grade 512	1 lb	5.75
M-512 Type 4A	6x1 lb, cs	27.60
4-8 Mesh; Beads	5 lb	14.05
Effective pore size 4Å	4x5 lb, cs	45.00
base: Alumina-Silicate	25 lb	63.40
cation: Sodium	4x25 lb, ea	50.70
For use in refrigerant drying	50 lb	108.50
	2x50 lb, ea	100.50
	120 lb	206.40

MOLECULAR SIEVES Grade 513	1 lb	5.65
M-513 Type 4A	6x1 lb, cs	27.00
4-8 Mesh; Beads	5 lb	13.90
Effective pore size 4Å	4x5 lb, cs	44.40
base: Alumina-Silicate	25 lb	62.50
cation: Sodium	4x25 lb, ea	50.00
For dehydration of gases.	50 lb	123.15
	2x50 lb, ea	98.50

MOLECULAR SIEVES Grade 514	1 lb	5.65
M-514 Type 4A	6x1 lb, cs	27.00
8-12 Mesh; Beads	5 lb	13.90
Effective pore size 4Å	4x5 lb, cs	44.40
base: Alumina-Silicate	25 lb	62.50
cation: Sodium	4x25 lb, ea	50.00
For dehydration of liquids.	50 lb	123.15
	2x50 lb, ea	98.50

MOLECULAR SIEVES Grade 516	1 lb	5.89
M-516 Type 4A	6x1 lb, cs	28.20
14-30 Mesh; Granules	5 lb	14.45
Effective pore size 4Å	4x5 lb, cs	46.20
base: Alumina-Silicate	25 lb	65.30
cation: Sodium	4x25 lb, ea	52.25
For dehydration of liquids.	50 lb	128.75
	2x50 lb, ea	103.00
	120 lb	213.00

MOLECULAR SIEVES Grade 518	1 lb	6.15
M-518 Type 4A	6x1 lb, cs	29.40
10-16 Mesh; Beads	5 lb	14.05
Effective pore size 4Å	4x5 lb, cs	45.00
base: Alumina-Silicate	25 lb	63.45
cation: Sodium	4x25 lb, ea	50.75
For dehydration of liquids.	50 lb	125.65
	2x50 lb, ea	100.50
	120 lb	206.40

MOLECULAR SIEVES Grade 521	1 lb	6.65
M-521 Type 5A	6x1 lb, cs	31.80
4-8 Mesh; Beads	5 lb	14.30
Effective pore size 5Å	4x5 lb, cs	45.80
base: Alumina-Silicate	25 lb	65.00
cation: Calcium	4x25 lb, ea	52.00
For use in separation and purification of gases.		

MOLECULAR SIEVES Grade 522	1 lb	6.50
M-522 Type 5A	6x1 lb, cs	31.20
8-12 Mesh; Beads	5 lb	14.30
Effective pore size 5Å	4x5 lb, cs	45.80
base: Alumina-Silicate	25 lb	65.00
cation: Calcium	4x25 lb, ea	52.00
For use in separation and purification of liquids.		

MOLECULAR SIEVES Grade 542	1 lb	7.40
M-542 Type 13X	6x1 lb, cs	35.40
4-8 Mesh; Beads	5 lb	18.45
Effective pore size 10Å	4x5 lb, cs	59.00
base: Alumina-Silicate	25 lb	84.70
cation: Sodium	4x25 lb, ea	67.75
For purification of gases and catalytic applications.	50 lb	167.50
	2x50 lb, ea	134.00

MOLECULAR SIEVES Grade 544	1 lb	7.40
M-544 Type 13X	6x1 lb, cs	35.40
8-12 Mesh; Beads	5 lb	18.45
Effective pore size 10Å	4x5 lb, cs	59.00
base: Alumina-Silicate	25 lb	84.70
cation: Sodium	4x25 lb, ea	67.75
For purification of liquids and catalytic applications		

MOLECULAR SIEVES Grade 562

M-562	Type 3A	1 lb	5.65
	4-8 Mesh; Beads	6x1 lb, cs	27.00
	Effective pore size 3Å	5 lb	14.30
	base: Alumina-Silicate	4x5 lb, cs	45.80
	cation: Potassium	25 lb	65.00
	For dehydration of gaseous olefins and alcohols.	4x25 lb, ea	52.00

MOLECULAR SIEVES Grade 564

M-564	Type 3A	1 lb	5.65
	8-12 Mesh; Beads	6x1 lb, cs	27.00
	Effective pore size 3Å	5 lb	14.30
	base: Alumina-Silicate	4x5 lb, cs	45.80
	cation: Potassium	25 lb	65.00
	For dehydration of liquids, olefins and alcohols.	4x25 lb, ea	52.00

Actual Lot Analysis Reported on Label

Color (APHA)	20
Boiling Range	96-98°C
Sp. Gr. at 25°C	0.801-0.803
Residue after Evaporation	0.01%
Acidity (as <chem>CH3COOH</chem>)	0.02%

Δ1-PROPANOL (N-Propyl Alcohol)

A-414-S Fisher CERTIFIED	4 liter	17.10
Safe-Tin™	4x4 liter, cs	50.40

CH3CH2CH2OH F.W. 60.10
(Non-Mailable)

Actual Lot Analysis Reported on Label

Color (APHA)	20
Boiling Range	96-98°C
Sp. Gr. at 25°C	0.801-0.803
Residue after Evaporation	0.01%
Acidity (as <chem>CH3COOH</chem>)	0.02%

2-PROPANOL PESTICIDE GRADE (Iso-Propyl Alcohol)

ΔA-519 For Pesticide Residue Analysis	1 gal	23.25
Fisher CERTIFIED	4x1 gal, cs	68.00

(CH3)2CHOH F.W. 60.10
(Non-Mailable)

Test condition for gas chromatography using electron capture detection: 1 nanogram of heptachlor epoxide gives approximately half scale deflection on chromatogram. Solvent suitability: no interfering G.L.C. peaks greater than that given by 0.02 nanogram/ml of heptachlor epoxide, tested separately on 10% Dow 11 and 2% QF-1, each on Chromosorb W. Reference: F.D.A. Pesticide Analytical Manual Volumes I and II

2-PROPANOL 99 Mol % Pure (Iso-Propyl Alcohol)

ΔA-432 Fisher CERTIFIED	1 qt	11.00
Meets ACS Specifications	6x1 qt, cs	43.20

(CH3)2CHOH F.W. 60.10
(Non-Mailable)

Chromatographic curve and ultraviolet absorbance curve available on request. see Section on 99 mol%

2-PROPANOL SPECTRANALYZED®

ΔA-419 (Iso-Propyl Alcohol)	1 qt	7.00
Fisher CERTIFIED ACS	6x1 qt, cs	24.00
<chem>(CH3)2CHOH</chem> F.W. 60.10	1 gal	15.75
(Non-Mailable)	4x1 gal, cs	44.00

For use in the ultra-violet and infra-red range

Actual Lot Analysis Reported on Label

Color (APHA)	10
Density (g/ml) at 25°C	0.781-0.783
Boiling Point	82.3 ± 0.1°C
Boiling Range	Not more than 1.0°C
Residue after Evaporation	0.001%
Solubility in Water	Clear
Water (H ₂ O)	0.2%
Neutrality	Pass test

Optical Absorbance

Wavelength (nm)	Maximum Absorbance
210	1.00
220	0.40
230	0.20
245	0.08
260	0.04
275	0.03
300	0.02
330-400	0.01

Maximum Infra-Red Transmittance in Micrometers 0.015mm cell, 70-100% T 3.6-6.6; 9.5-10.0; 11.1-12.0
Ultra-violet absorbance curves for each lot are run against distilled water set at zero absorbance. Curves available on request.

Δ2-PROPANOL (iso-Propyl Alcohol)

A-417 Fisher CERTIFIED	1 qt	7.00
<chem>(CH3)2CHOH</chem> F.W. 60.10	6x1 qt, cs	24.00
(Non-Mailable)	1 gal	15.75
	4x1 gal, cs	44.00

Suitable for use in Cholesterol and Triglycerides Determinations in regular and "N" methods.

Designated by Technicon Co., Inc. for equivalent item: T01-0064 T01-0073

2-PROPANOL (iso-propyl Alcohol)

adsorbent world

Adsorbents from Fisher are distinguished by their efficiency, their purity, and their economy (by virtue of endless regeneration).

1

Fisher Silica Gels are thirsty. Selectively adsorb up to 40% of their weight in water. Also alcohol. Hydrocarbons. A variety of other chemicals.

They are the ideal desiccant. With water removal so efficient that dew points of -80°F are achieved. And truly reversible in action. (Internal structure undergoes neither physical nor chemical change — even when saturated with water, gels look and feel dry.)

These gels are chemically inert and nontoxic. Free from all metallic contaminants. With high capacity and selectivity. And rugged — because they are pre-attriated. (Beds as deep as 25 ft have been operated for years, without particle crushing, attrition or dusting.)

In 17 grades, for the full spectrum of lab and industrial uses. Thirsty for answers? Try Fisher Silica Gels.

2

Fisher Molecular Sieves separate molecules by size and configuration. Close control of size and distribution of macro pores provides extremely rapid adsorption. These sieves are fast, fast, fast.

Neither chemical nor physical properties are affected by adsorption/desorption process. And precision bead shape minimizes frictional wear. (Dynamic applications can be run smoothly time and again.)

Above all: the unique manufacturing process gives these sieves unusually high useful capacity . . . a minimum of non-selective surface. In a broad selection of sieve types, mesh sizes, and grades. Choose the one for you.

Silica Gels

Grade	Fisher Cat. No.	Special Characteristics	Particle Size (Tyler Sieve)	Surface Area (Sq. Meters/Gram)	Application
01	S-154	Tailored Particle Size Distribution	3-8	720-760	Dehydration of gases, trace hydrogen removal. Usually recommended for special applications where particle size is critical.
03	S-692	—	on 8	720-760	Bulk dehydration and hydrocarbon recovery — natural and other industrial gases.
05	S-155	—	6-16	720-760	Liquid and gas dehydration — special because of controlled particle size distribution.
12	S-157	—	28-200	720-760	Chromatographic gels.
22	S-161	TLC	100-200	320	Thin-layer chromatography — pH (10% slurry) 7.0-7.5, very low extractables.
35	S-696	—	12-42	720-760	Packaging — because of size they could be used in selected liquid applications.
40	S-684	—	6-12	720-760	Liquid and gas dehydration.
41	S-698	—	3-9	720-760	Gas dehydration and dehydrocarbon recovery.
42	S-160	Blue Indicating Gel	6-16	720-760	Indicating — blue to pink.
43	S-707	Blue Indicating Gel	14-20	720-760	Indicating — blue to pink.
44	S-689	Blue Indicating Gel	3-8	720-760	Indicating — blue to pink.
59	S-699	—	3-8	340	Non-decrepitating — mainly used to top off beds of other gels to protect them from entrained liquid water.
62	S-704	—	60-200	340	Chromatographic separation of hydrocarbons, steroids, complex organic compounds.
407	S-701	—	8-20	720-760	Bulk liquid dehydration as refrigerants; air drying in insulating glass.
408	S-156	—	12-28	720-760	Bulk liquid dehydration as refrigerants; air drying in insulating glass.
923	S-679	High Purity	100-200	700	Ultra high purity chromatographic gels.
950	S-662	High Purity	60-200	700	Ultra high purity chromatographic gels.

SILVER NITRATE SOLUTION, 1N

So-S-68 Fisher CERTIFIED	1 pt	48.65
Standardized at 25°C	6x1 pt, cs	233.40
	1 qt	95.50
	6x1 qt, cs	458.40

Normality 1.002-0.998

SILVER NITRATE SOLUTION, 0.1N(N/10)

So-S-72 Fisher CERTIFIED	1 pt	7.55
Standardized at 25°C	6x1 pt, cs	36.30
	1 qt	11.90
	6x1 qt, cs	57.12
	1 gal	45.80
	4x1 gal, cs	146.60
	5 gal PolyPac	147.50

Normality 0.1001-0.0999

SILVER NITRATE SOLUTION, CONCENTRATE, N/10

So-S-73 Fisher CERTIFIED	ea	13.15
Each bottle contains exact amount of 1N concentrate required to make 1 liter of 0.1N(N/10)	6, cs	63.12

Normality 0.1005-0.0995

SILVER NITRATE STANDARD SOLUTION, 0.017N

So-S-84 Whitehorn and A.P.H.A.	1 qt	10.00
For determination of Chlorides in blood and in water.	6x1 qt, cs	48.06

Standardized at 25°C.

1 ml = 1 mg NaCl ± 0.02 mg

american chemical society

World's largest professional organization devoted to a single science . . . over a century of service to mankind . . . is also source of the laboratory world's universally accepted standard for chemical purity: "Reagent Chemicals, American Chemical Society Specifications." It may well be the most important single publication on the chemical reference shelf.

Fisher reagent-grade solvents faithfully meet these specifications in every instance where they have been established, and are designated by the initials ACS. In Fisher Certified Reagents, this compliance is further documented by a detailed analysis on the label showing actual values for the lot in the container (not mere "limits" of impurities, minimum assay values, or range of tests).

In laboratory and production applications alike, you simply cannot beat the assurance of a Fisher Certified ACS Solvent. Or, where ACS specifications have not been established, a Fisher Certified Solvent.

All solvents available direct from stock, at your nearest Fisher branch. In full range of sizes. From easy-to-use pints and quarts . . . to money-saving 55-gallon drums. Your laboratory deserves no less.

triple guarantee

Fisher 99+ Mol % Solvents are guaranteed free from any organic that might mask GC readout. Guaranteed to have an assay of at least 99+ mol %. Guaranteed to meet all ACS specifications.

In short: they provide what you need for contemporary gas chromatography. Designed for ultra-sensitive flame ionization and thermal conductivity detectors. Each individual lot painstakingly analyzed by FID and TCD before approval for final packaging.

These are Fisher Certified Reagents, distilled in glass for maximum purity. Super-assay organics to expedite specialized syntheses. Materials so pure they can be used in standardizing molecular weight apparatus. Detailed lot analysis on each label. Chromatograms furnished on request.

INDEX

spectranalyzed[®]

it means interference-free uv and ir detection

Spectranalyzed solvents are designed for spectrophotometry—without-interference. Each is painstakingly rectified in special glass-lined columns or stills until absorbance is within stringently set limits. Some 23 have absorption cut-off in UV; 16 have high-transmission “windows” in IR. See individual catalog listings for details. A curve for each lot is, of course, available on request.

These are Fisher Certified reagents, too — and that means each lot is put through our own rigid purity tests, with the detailed lot analysis printed on the label. They meet ACS specifications, of course (in many instances, even surpass ACS specs).

Simply check table at right — and match solvent's absorbance with your particular application. Then order — for worry-free spectrophotometry.

Fisher Spectranalyzed Solvents

Δ T-313	C ₆ H ₅ CH ₃ F.W. 92.14	1 qt	6.40
----------------	--	------	------

6x1 qt, cs 21.00

1 gal 12.65

4x1 gal, cs 34.00

Meets ACS Specifications

Maximum Limits of Impurities

Color (APHA) 10 Maximum

Absorbance Less than 0.01A, 450-345 Nm

Use-tested for quenching efficiency

and background.

see Section on SpectranalyzedTM Reagents

TOLUENE SPECTRANALYZED*

ΔT-330	Fisher CERTIFIED ACS	1 qt	8.25
	$C_6H_5CH_3$ F.W. 92.14	6x1 qt, cs	30.00
	(Non-Mailable)	1 gal	18.25
	For use in the ultra-violet and infra-red range	4x1 gal, cs	52.00

Actual Lot Analysis Reported on Label

Color (APHA)	10
Boiling Point	$110.6 \pm 0.1^\circ C$
Boiling Range	Not more than $2.0^\circ C$
Residue after Evaporation	0.001%
Substances Darkened by H_2SO_4	Color pass test
Sulfur Compounds (as S)	0.003%
Water (H_2O)	0.02%
Heavy Metals (as Pb)	0.1 ppm
Iron (Fe)	0.1 ppm
Copper (Cu)	0.1 ppm
Nickel (Ni)	0.1 ppm

Optical Absorbance

Wavelength (nm)	Maximum Absorbance
286	1.00
288	0.50
293	0.20
300	0.10
310	0.05
335	0.02
340-400	0.01

Maximum Infra-Red Transmittance in Micrometers

0.025 mm cell, 70-100% T

2.5-3.2; 3.6-5.1; 7.4-8.4; 9.8-13.2

Ultra-Violet absorbance curves for each lot are run against distilled water set at zero absorbance. Curves available on request.

TOLUENE		1 pt (.92 lb)	4.20

finicky

Our finicky manufacturing chemists guarantee that Fisher Cholesterol Color Reagent for the SMA* 12/60* will stay clear.

We keep ours water-white by keeping it super-cool. In special glass-lined reactor tanks (not conventional plastic vats). We put a red refrigeration-reminder band around each cap for you. And ship in polyfoam-insulated boxes with dry-ice packs.

Fact is, all Fisher reagents for Technicon® chemistry instrumentation are superior. We keep precipitates, particles, and bacteria out. (Even tough items like Neocuproine Copper, BUN-Color, SGOT Substrates, and Biuret Reagent are precipitate-free.) We use the finest deionized/distilled water. Sterile-filter everything. Finicky lot analysis, use-tests, and electrostatically-cleaned containers are musts, too.

We'll arrange a standing-order plan to suit your needs. There's no middleman, so you save substantially. We know how vital automated chemistry is to your operation. So delivery is immediate — the year around. We're finicky about that, too.

Fisher Reagents for SMA[®] Systems and Auto Analyzer[®] II

Test	Fisher Cat. No.	Technicon Equivalent	Product	Unit Capacity	Unit Price
Albumin	CS-100-2	(0179)	HABA Dye Stock Solution 0.006M	1 qt	10.30
	CS-100-1	(0179)	HABA Dye Stock Solution 0.006M	1 gal	32.60
	CS-105-1	(0184)	Phosphate Stock Buffer, pH 6.0-6.2	1 gal	5.65
	CS-105-5	(0184)	Phosphate Stock Buffer, pH 6.0-6.2	5 gal	19.00
	CS-103-1	—	Bromcresol Green Stabilized Solution	1 gal	19.00
Alkaline Phosphatase	CS-110-4	(0314)	Magnesium Chloride, 1.0M	4 fl oz	3.25
	CS-115-1	(0312)	Working AMP Buffer, pH 10.25 @25°C	1 gal	8.15
	CS-115-5	(0312)	Working AMP Buffer, pH 10.25 @25°C	5 gal	32.60
	CS-120-B	(0313)	p-Nitrophenyl Phosphate*	Bx(10x.5 g)	40.00
	CS-120-D	(0313)	p-Nitrophenyl Phosphate*	Bx(12x2 g)	95.00
Bilirubin, Total	CS-125-1	(0151)	Caffeine Diluent	1 gal	12.55
	CS-125-5	(0151)	Caffeine Diluent	5 gal	43.45
	CS-130-F	(0169)	Sodium Nitrite	Bx(6x5 g)	8.00
	CS-135-1	(0058)	Sulfanilic Acid, 1%w/v in 0.18N Hydrochloric Acid	1 gal	5.40
	CS-135-5	(0058)	Sulfanilic Acid, 1%w/v in 0.18N Hydrochloric Acid	5 gal	17.40
	CS-140-1	(0152)	Tartrate Buffer Solution	1 gal	13.50
	CS-140-5	(0152)	Tartrate Buffer Solution	5 gal	46.70
Bilirubin, Direct	CS-131-C	(0153)	Ascorbic Acid	Bx(12x1 g)	8.00
B.U.N. (Blood Urea Nitrogen)	CS-250-1	(0401)	Working B.U.N. Color Reagent	1 gal	7.05
	CS-250-5	(0401)	Working B.U.N. Color Reagent	5 gal	13.05
	CS-255-1	(0162)	Working B.U.N. Acid Reagent	1 gal	9.05
	CS-255-5	(0162)	Working B.U.N. Acid Reagent	5 gal	16.85
Calcium	CS-145-1	(0317)	8-Hydroxyquinoline, 0.25%w/v	1 gal	6.00
	CS-150-1	(0318)	Cresolphthalein Complexone, 0.007%w/v, 8-Hydroxyquinoline 0.25%w/v	1 gal	9.25
	CS-155-1	(0319)	Diethylamine, 3.75%v/v with 0.05% Potassium Cyanide	1 gal	6.80
Carbon Dioxide	CS-295-4	—	CO ₂ Color Reagent Set (Sufficient amount for approx. 5 gal.)	Bx(2x4 oz)	10.90
	CS-296-1	(0387)	Sulfuric Acid, 0.5N	1 gal	5.15
	CS-297-1	(0164)	CO ₂ Color Reagent Working	1 gal	6.25
	CS-312-1	(0351)	Sulfuric Acid, 1.0N	1 gal	5.15
Chloride	CS-298-1	(0352)	Chloride Color Reagent	1 gal	6.25
	CS-299-1	(0353)	Nitric Acid, 0.25N	1 gal	5.40
Cholesterol	CS-160-1	(0198)	Cholesterol Color Reagent*	1 gal	23.70
	CS-160-2	(0198)	Cholesterol Color Reagent*	Cs(6x1 qt)	38.00
CPK Creatine Phosphokinase	CS-301-4	(0395)	Diacetyl (Diketobutane)	4 fl oz	14.00
	CS-302-2	(0389)	Imidazole Buffer, 0.13M, pH 6.8 @37°C (with 0.019M Mg ⁺⁺)	1 qt	4.60
	CS-303-4	(0392)	Mercaptoethanol	4 fl oz	12.00
	CS-305-1	(0399)	Sodium Hydroxide, 2.0N (with 0.013M EDTA)	1 gal	8.15
	CS-307-N	(0466)	Creatine Phosphate-ADP 1 hr. set, (6x290mg CPK) (6x107mg ADP)	Bx(6 sets)	45.00
	CS-307-P	(0467)	Creatine Phosphate-ADP* 3 hr. set, (6x870mg CPK) (6x321mg ADP)	Bx(6 sets)	120.00
	CS-308-D	(0393)	Orcinol	Bx(6x2 g)	21.00
	CS-316-1	(0465)	N-Ethylmaleimide, 0.04M	1 gal	29.15
Creatinine	CS-309-1	(0385)	Sodium Chloride, 1.8%	1 gal	5.40
	CS-310-1	(0044)	Sodium Hydroxide, 0.5N	1 gal	9.32
	CS-310-5	(0044)	Sodium Hydroxide, 0.5N	5 gal	26.05
	CS-311-1	(0043)	Picric Acid, Saturated Solution	1 gal	9.50
	CS-311-5	(0043)	Picric Acid, Saturated Solution	5 gal	29.35

*Requires refrigeration at 2°-8°C.

Fisher Reagents for SMA® Systems and Auto Analyzer® II (cont'd)

Test	Fisher Cat. No.	Technicon Equivalent	Product	Unit Capacity	Unit Price
Glucose	CS-165-1	(0315)	Sodium Carbonate 0.25M	1 gal	5.40
	CS-170-1	(0176)	Neocuproine Copper Reagent	1 gal	22.80
	CS-175-1	(0381)	Sodium Chloride, 0.9% (with Brij ¹ 35)	1 gal	5.40
Inorganic Phosphate	CS-179-1	(0636)	Ammonium Molybdate, 1% in 1.32N Hydrochloric Acid	1 gal	6.50
	CS-180-1	(0326)	Ammonium Molybdate, 1%w/v in 2N Sulfuric Acid	1 gal	6.20
	CS-185-2	(0327)	Hydrazine Sulfate, 1%w/v	1 qt	2.45
	CS-186-L	(0213)	Stannous Chloride	Bx(10x0.4 g)	6.00
	CS-190-1	(0330)	Sulfuric Acid, 1%v/v (with Ultrawet ² 60L)	1 gal	5.50
	CS-195-1	(0325)	Sulfuric Acid, 1%v/v (with Brij ¹ 35)	1 gal	5.05
LDH (Colorimetric @37°C)	CS-200-1	(0210)	LDH Substrate* pH 8.8	1 gal	7.05
	CS-205-R	(0193)	NAD Diaphorase* (Lyophilized)	Bx(24x25 ml)	185.00
	CS-210-2	(0197)	INT Dye Solution 0.0625%w/v*	1 qt	9.50
	CS-215-2	(0328)	LDH Blank Solution	1 qt	3.25
	CS-220-1	(0329)	Hydrochloric Acid, 0.4N	1 gal	4.60
LDH 340 Method	CS-214-1	(0637)	LDH Substrate*, pH 9.0 @25°C	1 gal	9.50
	CS-216-1	(0464)	LDH Substrate* pH 9.0 @25°C	1 gal	6.50
	CS-217-1	(0462)	AMP Buffer pH 9.0 @25°C	1 gal	6.50
	CS-218-M	(0463)	NAD (DPN)* (Lyophilized)	Bx(12x300 mg)	60.00
	CS-218-H	(0508)	NAD (DPN)* (Lyophilized)	Bx(12x600 mg)	70.00
SGOT (Colorimetric @37°C)	CS-225-1	(0316)	SGOT Substrate* pH 7.4 @25°C	1 gal	21.70
	CS-230-W	(0335)	Azoene ³ Fast Red*	Bx(10x0.2 g)	10.00
	CS-230-G	—	Azoene ³ Fast Red*	100 g	190.00
	CS-235-1	(0173)	SGOT Citrate Buffer, pH 4.5 @25°C	1 gal	6.50
	CS-235-5	(0173)	SGOT Citrate Buffer, pH 4.5 @25°C	5 gal	17.40
SGOT 340 Method	CS-226-1	(0446)	SGOT Substrate* pH 7.4 @25°C	1 gal	21.70
	CS-228-1	(0638)	SGOT Substrate* pH 7.4	1 gal	21.60
	CS-236-1	(0445)	SGOT/SGPT Phosphate Buffer, pH 7.4 @25°C	1 gal	6.50
	CS-237-S	(0444)	MDH/NADH* (Lyophilized)	Bx(12x50 ml)	40.00
	CS-238-S	(0639)	MDH/NADH* (Lyophilized)	Bx(12x50 ml)	40.00
SGPT, 340 Method	CS-201-Q	(0459)	SGPT Substrate (12x55.4 g dl-Alanine, 12x1.73 g α-Ketoglutaric Acid)*	Bx(24 vls)	60.00
	CS-204-S	(0460)	LDH/NADH* (Lyophilized)	Bx(12x50 ml)	100.00
	CS-236-1	(0445)	SGOT/SGPT Phosphate Buffer, pH 7.4 @25°C	1 gal	6.50
Sodium and Potassium	CS-300-1	(0388)	Lithium Sulfate Solution 250mEq/liter in 0.25N Sulfuric Acid	1 gal	6.50
	CS-500-4	(0417)	High SMA® Expansion Reference Standard	4 oz	2.52
	CS-505-4	(0416)	Low SMA® Expansion Reference Standard	4 oz	2.52
Total Protein	CS-240-1	(0165)	Working Biuret Solution	1 gal	6.75
	CS-240-5	(0165)	Working Biuret Solution	5 gal	27.70
	CS-245-1	(0348)	Total Protein Blank Solution	1 gal	7.05
	CS-245-5	(0348)	Total Protein Blank Solution	5 gal	28.25
Uric Acid	CS-175-1	(0381)	Sodium Chloride, 0.9% (with Brij ¹ 35)	1 gal	5.40
	CS-260-1	(0320)	Sodium Hydroxide 0.025N	1 gal	5.40
	CS-265-1	(0321)	Hydrochloric Acid Solution 0.02N	1 gal	5.50
	CS-270-1	—	Sodium Tungstate, 60%w/v	1 gal	118.50
	CS-271-1	—	Sodium Tungstate, 40%w/v	1 gal	76.00
	CS-272-1	(0322)	Sodium Tungstate, 50%w/v	1 gal	100.00
	CS-275-1	(0323)	Hydroxylamine Hydrochloride, 0.2%w/v	1 gal	5.25
	CS-280-1	(0324)	Phosphotungstic Acid Solution	1 gal	23.15

*Requires refrigeration at 2°-8°C.

Johnson, Matthey Specpure® Materials

Spectrographically certified standards for over 70 elements

All Fisher branches plus our Jarrell-Ash Division are representatives in the United States for SpecPure® Spectrographically Standardized Materials produced by Johnson, Matthey Chemicals Limited of England. Johnson, Matthey is an internationally recognized leader in the production of highest purity standards covering over 70 elements.

These pages show total of metallic impurities detected spectrographically for all elements sold in metallic state and as solid compounds. Variation of purity between batches is inevitable, but details of the impurities detected in particular batch are contained in laboratory certificate of analysis which is included in

each package. Spectrographic methods used in analysis of all materials are in many cases supplemented by other methods of analysis appropriate to the material.

Metals

For convenience of the user, many of the metals are available in the form of rods, and for economy in production these are generally of one size only. It is, however, possible for some of the standard rods to be reduced in diameter, drawn to wire or rolled into foil. Where there is a need for larger sizes of rod or for different forms, we are pre-

pared to contact Johnson, Matthey asking for consideration of special production on receipt of full particulars, including the quantity required.

Compounds

Preparation of compounds not listed in here will always be considered on receipt of full particulars, including quantity required.

All prices are subject to change without notice. Orders will be accepted at current prevailing prices. Terms: Net 30 days. FOB: Destination within United

States, via our routing, surface transportation.

Minimum Order: Ten Dollars.

Every SpecPure® material is supplied with certificate of analysis.

Metals and Compounds

For convenience many of the metals are available in standard size rod form. It is possible, however, for some rods to be reduced in diameter, drawn to wire or rolled into foil. In addition, larger sizes of rod, different forms, or metal compounds will be considered for special production upon receipt of full particulars, including the quantity required.

Specpure® Aluminum and Aluminum Compounds

This metal is selected from high-purity ingots produced by British Aluminum Company Limited.

PPM	Size	Cat. No.	Price
Aluminum Rod (6.35mm dia x 15cmL; approx wt 13g/rod)			
50†	----	JM-340	Ea/ 6.56
	----		Pk of 10/ 44.10
Aluminum Oxide Al ₂ O ₃			
10†	10g	JM-345	Ea/ 38.80
	100g		Ea/140.70
Aluminum Chloride AlCl ₃ · 6 H ₂ O			
5†	100g	JM-346	Ea/ 38.50
Aluminum Nitrate Al (NO ₃) ₃ · H ₂ O			
10†	10g	JM-348	Ea 21.70

Specpure® Ammonium Compounds

Ammonium Sulphate (NH ₄) ₂ SO ₄			
10†	100g	JM-1059	Ea 35.00

Specpure® Antimony and Antimony Compounds

This metal is purified by zone refining. Total metallic impurities detected spectrographically do not exceed 1 part million in metal.

Antimony Broken Ingot			
1†	100g	JM-660	Ea/100.10

PPM	Size	Cat. No.	Price
Antimony Tetroxide Sb ₂ O ₄			
10†	10g	JM-665	Ea/ 31.50
	100g		Ea/214.20
Antimony Trichloride SbCl ₃ (in sealed tubes)			
10†	5g	JM-666	Ea/ 28.70
	10		Ea/ 49.00
	100		Ea/306.60

Specpure® Arsenic and Arsenic Compounds

Arsenic is produced in JM laboratories in form of fused crystalline lump and is supplied in vacuum sealed tubes. Total metallic impurities detected spectrographically do not exceed 5 parts million in lump.

Arsenic Crystalline Lump			
5†	5g	JM-640	Ea/ 27.30
	10		Ea/ 49.00
	100		Ea/341.60
Arsenic Trioxide			
10†	10g	JM-642	Ea/ 21.00
	100		Ea/144.20

Specpure® Barium Compounds

This element is not suitable for being supplied in metallic form and is therefore supplied in form of solid compounds.

Barium Carbonate BaCO ₃			
10†	10g	JM-92	Ea/ 21.00
	100		Ea/140.70
Barium Nitrate Ba(NO ₃) ₂			
10†	100g	JM-94	Ea/ 91.70

†Metallic Impurities in ppm

Specpure® Beryllium and Beryllium Compounds

This metal is available in form of flake; total metallic impurities detected spectrographically do not exceed 500 parts/million.

PPM	Size	Cat. No.	Price
Beryllium Flake			
500†	5g	JM-110	Ea/ 66.50
	10		Ea/119.00

Specpure® Bismuth and Bismuth Compounds

This metal is prepared in JM refinery and is supplied in form of broken ingot. Total metallic impurities detected spectrographically do not exceed 10 parts/million.

Bismuth Broken Ingot			
10†	100g	JM-680	Ea/ 52.50
Bismuth Oxide Bi ₂ O ₃			
10†	100g	JM-685	Ea/114.10
Bismuth Chloride (sublimed in sealed tubes)			
10†	5g	JM-686	Ea/ 24.50
	10		Ea/ 87.50
	100		Ea/294.00
Bismuth Nitrate			
10†	100g	JM-687	Ea/110.00

Specpure® Boron and Boron Compounds

Boron is supplied in form of zone-refined rod; total metallic impurities detected spectrographically do not exceed 5 parts/million.

Boron Rod (5mm dia supplied in sealed tubes containing 1g)			
5†	1g	JM-325	Ea/306.50
Boric Acid H₃BO₃			
5†	100g	JM-330	Ea/ 74.20

Specpure® Cadmium and Cadmium Compounds

Cadmium is prepared by Imperial Smelting Corporation (Sales) Limited. Metallic impurities, detected spectrographically, total approximately 10 parts/million.

Cadmium Rod (8mm dia x 10cmL; approx wt 40g/rod)			
10†	----	JM-170	Ea/ 21.00
Cadmium Oxide CdO			
10†	5g	JM-175	Ea/ 30.80
	10		Ea/ 47.60
	100		Ea/306.50
Cadmium Sulfate 3CdSO ₄ · 8H ₂ O			
10†	10g	JM-176	Ea/ 52.50

Specpure® Calcium Compound

This element is not suitable for being supplied in metallic form and is therefore supplied in a solid compound.

PPM	Size	Cat. No.	Price
Calcium Carbonate CaCO₃			
10†	10g	JM-90	Ea/ 32.20
	100		Ea/144.20

Specpure® Cerium Oxide

Purity of this rare earth oxide is established by emission spectrography, supplemented, where appropriate, by spectrophotometry and X-ray fluorescence spectrography.

Maximum total rare earth impurity contents are as stated. Impurities, other than rare earths, detected spectrographically do not exceed 20 parts/million in most cases.

Cerium Oxide CeO₂			
100††	10g	JM-304	Ea/37.80

Specpure® Cesium Compounds

This element is not suitable for being supplied in metallic form and is therefore supplied in the form of solid compounds.

Cesium Chloride CsCl			
10†	1g	JM-15	Ea/ 17.50
	5		Ea/ 60.20
	10		Ea/107.80
	100		Ea/639.10
Cesium Carbonate Cs₂CO₃			
10†	5g	JM-15-2	Ea/ 84.00
	10		Ea/151.20

Specpure® Chromium and Chromium Compounds

Chromium is produced electrolytically and is supplied in the form of beads. Total metallic impurities detected spectrographically do not exceed 10 parts/million.

Chromium Bead			
10†	10g	JM-703	Ea/ 20.30
	100		Ea/132.30
Chromium Sesquioxide Cr₂O₃			
10†	5g	JM-705	Ea/ 51.80
	10		Ea/ 94.50
	100		Ea/660.10

Specpure[®] Cobalt and Cobalt Compounds

This metal is prepared in JM labs by chemical processes and is supplied as sponge, rod, sheet, and wire. Sponge is produced by reduction of oxide and contains some gaseous impurities. Total metallic impurity content of sponge is not more than 15 parts/million while fabricated forms contain less than 25 parts/million.

PPM	Size	Cat. No.	Price
Cobalt Sponge

Specpure[®] Copper and Copper Compounds

Matthey copper is prepared in JM refineries by special electrolytic process to produce metal of highest degree of purity. The total metallic impurities detected spectrographically do not exceed 15 parts/million. Oxygen and dissolved gases are kept at low level by melting and casting *in vacuo*.

Copper Rod (15mm diax15cmL; approx wt 27g/rod)

Specpure[®] Gallium and Gallium Compounds

Prepared in JM laboratories from British raw material, this metal has total metallic impurity content of 1 part/million. Quantities less than 25g are supplied in the form of small lumps. Larger quantities are supplied as 25g or 250g rods. Owing to its low melting point (29.8°C), gallium should be stored in cool place.

Specpure® Holmium

Purity of this rare earth oxide is established by emission spectrography, supplemented, where appropriate, by spectrophotometry and X-ray fluorescence spectrography.

Maximum total rare earth impurity contents are as stated. Impurities, other than rare earths, detected spectrographically do not exceed 20 parts/million in most cases.

Holmium Oxide Ho_2O_3			
200††	0.5g	JM-316	Ea/ 33.60

Specpure® Indium and Indium Compounds

This metal is normally supplied in form of extruded wire 1.6mm dia, weighing approximately 0.15g per cm, but other sizes can be produced. Wire of any length can be supplied, but as metal is very soft and tends to cold weld, wire is coated with thin film of silicone grease. Sheet and ingots can also be supplied. Total metallic impurities detected spectrographically do not exceed 5 parts/million.

PPM	Size	Cat. No.	Price

(Contd. on next page.)

Johnson, Matthey Specpure® Materials, Contd.

Specpure® Tellurium and Tellurium Compounds

Tellurium is prepared in JM laboratories by two methods. Zone-refining is employed to produce massive metal, which is supplied as broken ingot. Total impurities detected spectrographically amount to approximately 10 parts/million. Chemical process is used to produce powder which contains some oxide and water; in this form impurities detected spectrographically do not exceed 10 parts/million.

PPM	Size	Cat. No.	Price
Tellurium Broken Ingot			
10†	10g	JM-795	Ea/ 26.60
	100		Ea/178.50

Specpure® Terbium

Purity of this rare earth oxide is established by emission spectrography, supplemented, where appropriate, by spectrophotometry and X-ray fluorescence spectrography. Maximum total rare earth impurity contents are as stated. Impurities, other than rare earths, detected spectrographically do not exceed 20 parts/million in most cases.

Terbium Oxide Tb₄O₇			
200††	0.5g	JM-314	Ea/ 38.50
	10		Ea/390.60

Specpure® Thallium and Thallium Compounds

Thallium is chemically refined in JM laboratories by process designed to give highest possible degree of purity. Total metallic impurities detected spectrographically do not exceed 10 parts/million. Thallium is supplied in form of extruded wire 1.6mm dia, of which 1cm weighs approximately 0.25g. Thallium oxidizes extremely readily in air, and it is impossible to avoid thin film of surface oxide. Metal is supplied, cut to any desired length, in sealed containers.

Thallium Wire (1.6mm dia)			
10†	10g	JM-400	Ea/27.30
Thallic Oxide Tl_2O_3

Specpure® JMC R.U. Powder

Powder was originally developed by J.W. Ryde and H. G. Jenkins at Research Laboratories of General Electric Company Limited, where spectrographical methods of analysis are in continual use. It was found to be of such value that it was considered worthwhile to prepare it in large quantities for general use.

The R.U. Powder consists of traces of fifty elements incorporated in suitable base material. Quantity of each element has been carefully adjusted so that the arc spectrum shows, on average, about seven lines of each element. These include the Raies Ultimes and other important sensitive lines. Each element is evenly distributed throughout bulk of powder.

The fifty elements represented are: Ag, Al, As, Au, B, Ba, Be, Bi, C, Ca, Cd, Co, Cr, Cs, Cu, Fe, Ge, Hg, In, Ir, K, La, Li, Mg, Mn, Mo, Na, Nb, Ni, Os, P, Pb, Pd, Pt, Rb, Rh, Ru, Sb, Sc, Si, Sn, Sr, Ta, Ti, Tl, V, W, Y, Zn, Zr.

Size	Cat. No.	Price
2g	JM-1062	Ea/66.50

Enlargements of Spectrum of R.U. Powder

Enlargements are in seven sections covering wavelength range from 6717Å down to 2288Å. Taken on Hilger large quartz Littrow spectrograph. Mounted on stiff cards.

Show arc spectrum of R.U. Powder together with iron arc comparison. In all, 367 Raies Ultimes and sensitive lines are marked, and table giving corresponding wavelengths in I.A. and relative arc sensitivity of more important lines. Most sensitive lines frequently differ from those given by de Gramont, who used spark excitation.

Booklet which includes tables of sensitive arc lines of above 50 elements and instructions for using R.U. Powder, will be sent free on request. Copy of this booklet is provided with each tube of powder or set of enlargements purchased.

Felt-Tip Marking Pens

Felt-tip marking pens with pocket clips and black ink. Ink dries quickly. Ideal for writing on glass, plastic. 11-855

PolyPaper™ plastic labels, and 11-906 field notebooks with plastic pages. (See p 313). Two types available.

Nalge No.	Type	Cat. No.	Pk of 4	Case of 12
6310	Lab Pen (fine-line)	13-382-50	7.20	19.44
6311	Lab Marker (broad-line)	13-382-51	7.20	19.44

Jarrell-Ash Direct-Reading Computer-Controlled AtomComp™ Spectrometers

Determine up to 50 elements simultaneously from sub ppm level to per cents

Programmed to analyze up to 50 elements simultaneously, in any combination. Any element or elements can be used as internal standards. Vary the operational parameters from the keyboard.

Computer monitors and controls all operational parameters — programs analysis, makes all computations and performs calculations necessary to print record of analysis.

Unique combination of advantages:

☐ **Rapid Analysis** — up to a sample per minute

☐ **Direct concentration printout** in % or ppm. No chance of reading or transcription errors.

☐ **Simple operation** — more than half the steps required to operate a conventional direct reader are automatic.

☐ **Trouble-free service** — solid state 100% protected circuitry operated far below capacity.

☐ **Automatic standardization** calculated from prestored values on up to 5 standards.

☐ **Solids and liquids** — Cat. No. 96-750 AtomComp is designated for analysis of solids. Cat. No. 96-975 Inductively Coupled Argon Plasma AtomComp for solutions.

Circle No. 1 on reply card for full information on AtomComp spectrometers.

Important Jarrell-Ash instruments are on these four blue pages. To get complete information on any system . . . return reply card on page 1597.

Need a simple, low cost, manually-operated direct-reader? That's the Jarrell-Ash Atomcounter. Circle no. 9 for a product bulletin.

Jarrell-Ash 3.4 Meter Ebert Spectrograph

Maximum versatility and exceptionally simple operation

Ideal for many phases of geochemistry, crime detection, and general spectrochemistry. With accessories, it's among the world's most renowned photographic systems.

Stigmatic instrument equipped with 50cm camera. Photographs 2650Å of 1st order spectra with 5Å/mm dispersion using a 15,000gpi grating. (76cm camera also available.)

Rotate grating between 0° and 60° . . . use any wavelengths between 2000Å and 30,000Å (1st order, 15,000gpi). Gratings easily interchanged for special problems.

Can be converted to high-resolution scanning monochromator, high-speed spectrometer with oscilloscope readout or precise direct reading spectrometer with up to 45 photomultiplier tubes. Cat. No. 70-310.

Circle No. 2 on reply card for detailed product literature.

70-310

Jarrell-Ash Laser Microprobe

Uses samples as small as 25μ

Detects 10⁻¹⁰ to 10⁻¹² grams of all elements

Augments analytical value of any commercial spectrograph. No need to remove existing arc spark stand or add wiring.

Analyzes micro-size area of any material — electrically conductive or not.

Sample preparation eliminated. Just 3-step operation: focus, fire, and analyze. Cat. No. 45-604.

Circle No. 3 on reply card for product bulletin.

45-604

Jarrell-Ash Monochromators

Versatile . . . small size . . . low cost

Half-Meter Monochromator

Wide range of interchangeable gratings provide dispersion and resolution for 2000Å to 22μ. Twelve scanning speeds — knob selection. With new 12-081 and 12-082 Adjustable Slits. Cat. No. 82-000.

Circle No. 4 on reply card for product data.

Two-Grating, Quarter-Meter Ebert Monochromator

Low cost and versatile. Scanning range: 1650 to 9000Å. Combine two of them (see photo below) . . . system ideal for fluorescent and allied studies. Cat. No. 82-410.

Circle No. 5 for product data.

Quarter-Meter Ebert Monochromator

Single grating unit; exceptionally low cost. Aperture ratio, $f/3.5$. Variety of gratings and accessories available. Gratings for 1650\AA to 20μ . Cat. No. 82-415.

Circle No. 6 for product data.

82-415 with 82-462

Omni Drive

Digital wavelength drive provides 10 scanning speeds from 10 to $2000\text{\AA}/\text{min}$. Quickly attaches to any quarter-meter Ebert monochromator. Can also be driven from external pulse train. Cat. No. 82-462.

Circle No. 7 for product data.

Light Sources

For Quarter-Meter Monochromators

Two light sources, each with 2 lamps. Cat. No. 45-547 light source has deuterium lamp for ultra violet and tungsten lamp for visible and infrared. Cat. No. 45-557 light source has broad, high pressure xenon lamp and mercury lamp for spectral calibration. Both sources are designed for maximum energy transfer.

Circle No. 8 for product bulletin.

For All Your Laboratory Needs

Catalog 77 is Fisher Scientific Company's fingertip guide to the laboratory world's most comprehensive listing of scientific products. Fisher is one of the world's leading manufacturers and distributors of laboratory apparatus, appliances, electrodes, furniture, glassware, instruments, and reagent chemicals. Since its founding in 1902, the Company's sole business has been supplying a wide variety of tools and aids to all kinds of laboratories.

Today Fisher is more than ever the toolmaker and supplier to science, with a vast inventory to fill the diversified needs of chemists, biologists, physicists, doctors, teachers, and technicians. Every type of laboratory is served: industrial (both research and quality control), governmental (local, state, and federal), environmental, educational (at primary, secondary, college, and graduate levels), or medical (in hospitals, boards of health, medical and paramedical education and pharmaceutical work).

In all, five Fisher manufacturing facilities and over 500 major scientific suppliers combine efforts to provide some 50,000 scientific products for all kinds of laboratories. To insure rapid world wide service, Fisher has 29 sales-distribution-service centers (with supporting sales offices) strategically located throughout the United States and Canada. Moreover, the Fisher International Division has expanded its major offices and has distributors in countries throughout the world.

This extensive network of Fisher facilities joins with more than 3300 employees to make Fisher truly the single source for every laboratory need, from the products themselves to their servicing and maintenance.

Personalized Customer Service

Sales are the life blood of Fisher Scientific Company — hence the Company takes great care in the selection and training of its professional representatives who deal directly with you. A substantial effort is made to select trainees from young graduate scientists who have several years laboratory experience and a bent for sales or management.

The trainee receives product and salesmanship instruction from two major sources. The Outside Sales Training Program (OST) enables the trainee to learn the theory, practical use and possible application of apparatus and instruments. Video tapes, actual training instruments and coordinating manuals are prepared by Fisher personnel in cooperation with leading manufacturers such as Ainsworth, Bausch and Lomb, Leco and Mettler. These materials are then distributed to trainees throughout the branches.

Principles of Professional Salesmanship (POPS) consist of video tapes, group work, and discussion sessions conducted at each branch. Branch managers and the individual salesmen adapt these sessions to their specific needs.

These programs produce men and women with unequalled product training and willingness to provide professional assistance to scientists with their laboratory needs. Qualities that make Fisher representatives distinctive.

Fisher divides this highly trained sales force among their major markets (Industrial, Clinical, Governmental, Educational). In addition, there are product specialists who devote their attention to specific areas (complex instruments, glassware, microscopes, furniture). They are available for consultation with customers on request.

Backing Up the Sales Representatives

... are highly trained and experienced customer service staffs. Aided by electronic-age equipment and procedures, they expertly handle details of order processing, product literature, instrument repair, and all the many areas of contact between Company and customer.

Fisher was a pioneer in computerizing the laboratory supply industry. A centralized computer system at Fisher headquarters in Pittsburgh connects directly with each U.S. branch for instantaneous inventory data. Each branch knows at a glance its own inventory, as well as the inventories of all other U.S. branches. As a result, the pooled stocks of all branches — over 1,000,000 square feet of warehouse space — are available to each branch. This unequalled computer control of over 50,000 items guarantees that any Fisher branch can supply laboratories with the equipment and reagents they want, whenever they want them.

A wide assortment of literature prepared by Fisher's own technical writers keeps you up-to-date on the latest scientific developments, products, and techniques in a number of fields. Various catalogs in both U.S. and Canadian versions (this Catalog 77, the Educational Materials Division catalog, the Contempra™ fur-

Manufacturing Facilities

niture catalog) are up-dated continually and printed every few years to provide current and comprehensive information on scientific products.

Fisher also publishes periodicals: *The Laboratory Reporter*, aimed at the industrial market; the *Med-Lab Reporter* for the medical, clinical and hospital laboratory markets; the *Environmental Reporter* directed to environmental testing labs; and the *Biology Reporter* for high school, college, and university life-science laboratories.

In addition, numerous sales and applications bulletins provide you with the latest technical information on new products, as well as detailed information on instrument applications. All publications are mailed free upon request.

Fisher manufactures many types of laboratory products, from basic laboratory clamps and other common hardware, to complex electro-analytical, biomedical, and spectrographic instruments for industry, quality control, pure research, and medicine.

In addition, Fisher produces electrodes, pipets, laboratory furniture, products for educational labs, and the finest quality gratings in the world for its optical instruments.

Research & Development

Fisher research and design engineers work continuously to develop new products and to improve present ones. Applied research for instruments, appliances, and other products goes on at Pittsburgh headquarters, and at the Jarrell-Ash Division in Waltham, MA. In addition, the search for new, better, purer reagents and related products is carried out at the Chemical Manufacturing Division in Fair Lawn, NJ.

In short, over 100 Fisher research personnel are constantly striving to produce the most up-to-date "tools" for all types of laboratories.

Instrument Manufacture

The Instrument Manufacturing Division (Indiana, PA) is the largest manufacturing facility in the company. Items produced there cover a wide area in complexity and price, varying from hand-assembled sophisticated electronic instruments (the Titrimeter®, Titralyzer® II, and Accumet® pH meters, to name a few) through pre-fabricated furniture modules to high-volume items (corrosion-resistant Castaloy® clamps, high-temperature burners, hot-plates, stirrers, shakers, grinders, water baths, ovens, and instruments to determine par-

ticle sizes, melting point, specific gravity, flash point, viscosity, and other physical and chemical properties).

Long before any instrument is delivered to your laboratory it has been "performance-tested" in typical laboratory situations and given many quality control inspections from the beginning of production until it is completed on the assembly line.

Electrode Manufacture

Operating in conjunction with the Instrument Division is the Fisher Electrode Shop located at corporate headquarters in Pittsburgh. It manufactures a complete line of laboratory electrodes for use in pH measurement, titration studies and other electrochemical procedures. Fisher electrodes made by our own glass experts, are individually tested to insure linear response over specified pH and temperature ranges. Each electrode is guaranteed to work perfectly when it leaves the shop.

Chemical Manufacture

The Fisher Chemical Manufacturing Division in Fair Lawn, NJ is one of the few major plants in America devoted exclusively to the production of reagent-grade chemicals. These chemicals include all of the nearly 300 reagents for which the American Chemical Society has established specifications, plus high-purity solutions and clinical formulations.

Here chemical compounds are made right from their basic elements; commercial grade chemicals are purified by recrystallization, distillation or similar processes; and other chemicals (already compounded to close specifications) are analyzed and packaged. Quality control is maintained through testing laboratories right in the plant.

Manufacturing Facilities Contd.

The Chemical Division is responsible for nearly 800 Fisher "CERTIFIED" reagents that certify purity by an actual lot number analysis on each label.

The entire Fisher Chemical Index is included in this catalog, starting on page 1248.

Jarrell-Ash Division

As one of the world's leading manufacturers of spectroscopic and analytical instrumentation, Jarrell-Ash produces dozens of highly sophisticated instruments, many with computer-controlled operation and data processing. They include atomic absorption spectrophotometers that quantify parts per billion of trace elements in a wide range of solutions; an inductively coupled argon plasma AtomComp which performs multi-element trace analyses on solution samples; direct reader air- and vacuum-AtomComp systems for rapid metal and solids analysis for major and minor constituents.

In addition, Jarrell-Ash produces spectrographs, small monochromators and a wide variety of quality diffraction gratings. An analytical laboratory performs routine chemical analysis on a per-sample or volume basis.

Educational Materials Division

This Chicago-based division manufactures and distributes educational scientific equipment for junior colleges, technical institutes, secondary and elementary schools. The equipment (some 12,000 different products, 40% manufactured by Fisher) is used in teaching chemistry, physics, biology, and general science.

In addition to its Chicago manufacturing facilities, EMD has an incomparable 327-acre Biology Resource Center in west-central Wisconsin. Here an experienced staff of botanists, embryologists, zoologists, and microbiologists produce one of the most comprehensive selections of live and preserved biological specimens for schools throughout the U.S.

A beautiful new 1200-page catalog presents all the materials supplied by EMD. For a copy, check no. 6 on the reader service card at the end of the blue index pages.

Contempra™ Furniture Division

Unless you're an architect, planning a new furniture installation can be a formidable problem. But problem-solving CFD and the Contempra Furniture Specialist make it easy. They have the specialized knowledge to do all the complicated planning for you.

To begin with, they can analyze your lab's work requirements and create a floor plan to coincide. They'll suggest the optimum combination of Contempra base units, work tops, fume hoods, and service fixtures necessary to provide maximum space yet allow efficient work flow.

These CFD specialists are backed up by a large staff of engineers who prepare the final detailed drawings, showing everything in place, down

to the last cold water faucet.

Contempra laboratory furniture is manufactured at Indiana, PA, in one of the nation's most advanced facilities for steel furniture production. This installation includes a 1/4-mile conveyor system to speed up production of the multi-color Contempra line (more than 55 different furniture modules).

All components of a beautiful, durable Contempra laboratory can be shipped *directly from stock* at CFD's well-filled warehouse.

To reach a CFD representative, call collect to (412) 349-3322 and identify yourself to the CFD operator as a customer.

Pfeiffer Glass, Inc.

This Fisher subsidiary has been a well-respected specialty manufacturer of quality glass products for over 45 years. Pfeiffer's facilities, including specially designed equipment utilizing the most modern techniques, are now devoted entirely to pipet design and production. Such concentrated effort on product improvement has made Pfeiffer the source of such industry firsts as high-accuracy general purpose pipets, permanent fused markings, enlarged easy-to-read numerals, color coding and three line combination-scale blood diluting pipets.

Each pipet is individually calibrated to the highest available accuracy with tolerances marked right on the pipet in most cases. Pipets meet or exceed federal specifications and/or requirements of the National Bureau of Standards.

Marketed as FISHERbrand®, Pfeiffer pipets meet every need — educational, industrial, pharmaceutical, hospital, clinical.

Meet Fisher's Instrument Service Specialists . . .

See how this highly trained, experienced corps can help you keep all your instruments at peak performance

We service everything we sell — and more

No need to deal with several service outfits; just call Fisher. We'll service everything you've bought from Fisher and everything from other lab suppliers. In short, every instrument or apparatus in your lab.

We do the job right

Every service expert has been Fisher-trained and factory-trained by leading manufacturers, so he's among the most knowledgeable and dependable in the business. You won't get hung up waiting for parts either, thanks to local stocks of replacement parts and extensive computer-controlled stock of major repair parts.

We're "on call" for all service situations

We're equipped to handle all your service needs — emer-

gency repairs, calibration and certification services, and preventive maintenance.

It pays to think preventive maintenance

Our regularly scheduled preventive maintenance programs can pay big dividends — minimize unexpected emergencies and downtime, reduce over-all repair costs, simplify your budget, and ultimately, extend the life of your instruments.

At your place or ours

We come to your lab for most routine service work. Major repairs are done in fully equipped service shops at each Fisher branch.

Call us — we're as near as your phone

Just call your nearest Fisher branch and ask for the service department. There are 19 branches strategically located throughout the U.S., so there's one handy to you.

International Trade Facilities

Experienced personnel at the Fisher International Division headquarters in Springfield, New Jersey join efforts with many foreign distributors to bring you personalized customer service throughout the world.

These people speak your language, know your customs, and understand and respect your specific needs and requirements. They are aware of instrumentation problems caused by differences in climate, humidity, and electrical voltage systems. They provide you with all the traditional Fisher services in regard to new products. They conduct an important spare parts program that permits instant dispatching.

Specialized Laboratory Planning

International Division Consultants have helped customers around the world to plan, design, and equip a wide variety of laboratories — forensic, environmental, food processing, medical, metallurgical, soil and plant testing, and poultry research, to name just a few.

They are available to help you set up the most modern and functional laboratory facilities available . . . and to help train your personnel in the use of new equipment.

Packing

Modern equipment and the latest packing methods are used to assure safe delivery of materials. Fisher provides all the shipping documents required by the country of destination. Steamship containers are available for large shipments. When special packing cases or wood containers are required for export shipments, a charge will be made to cover this cost.

Financing

Usual practice calls for payment by irrevocable letter of

credit drawn to the order of "Fisher Scientific Company" with a New York correspondent bank. You may suggest other methods of payment and, whenever practical, we will comply.

Communications

Contact any of the following principal international offices for rapid sales/service assistance. They will direct you to the closest of 124 Fisher product dealers located throughout the world.

Distributors and Agents

Overseas distributors and agents for Fisher Scientific Company are located in the following territories: Afghanistan, Africa, Algeria, Angola, Arab Republic of Africa, Argentina, Austria, Australia, Bahamas, Bangladesh, Belgium and Luxembourg, Bolivia, Brazil, Bulgaria, Cambodia, Cameroon, Chile, China (mainland), Columbia, Costa Rica, Czechoslovakia, Denmark, Dominican Republic, East Africa, Eastern Europe, Ecuador, El Salvador, England, Finland, France, Gabon, German Democratic Republic, Ghana, Greece, West Germany, Guatemala, Guyana, Western Honduras, Hong Kong, Hungary, India, Indonesia, Iran, Iraq, Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Jordan, Kenya, Korea, Kuwait, Lebanon, Liberia, Libya, Malaysia, Mocambique, Morocco, Netherlands, New Zealand, Nicaragua, Nigeria, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Puerto Rico and Virgin Islands, Rhodesia, Rumania, Saudi Arabia, Senegal, Singapore, South Africa, South Vietnam, Spain, Surinam, Sweden, Switzerland, Taiwan, Tanzania, Thailand, Trinidad and Tobago, Tunisia, Turkey, Uganda, United Kingdom, Uruguay, USSR, Venezuela, Yugoslavia, Zaire.

Using the Catalog

Products in Catalog 77 are conveniently listed in alphabetical order with easy-to-see product indicators appearing at the top corner of each page.

On the following blue pages, you will find three separate indexes that make it easier than ever to find just what you want. The first is an alphabetical listing of all items with most items cross-indexed one or more times. For example, 1-405 arsine generator is also listed under air pollution apparatus, generators, and FISHERbrand.

The second index is a numerical listing of Fisher catalog numbers with corresponding page numbers. If you are looking for a specific catalog number, this index makes it easy.

The third index provides a handy reference for customers who are familiar with the products of Fisher's major suppliers. Under the name of each supplier is a numerical listing of *their* catalog numbers and corresponding page numbers.

See also the Fisher Chemical Index located on pages 1267 through 1569. Check the introduction that directly precedes it (p 1248) for information concerning purity grades, packaging, safety and shipping standards, labeling, pricing, discounts, and helpful abbreviations.

How To Order

Use the catalog number, a brief description of the item, and the quantity you desire. Note that items like glassware combine a general catalog number with a letter to designate specific sizes or models. When ordering, be sure to include the letter designation where it occurs.

To order chemicals, check the introduction at the beginning of the Chemical Index (p 1248) for complete details.

To Request Detailed Information

Complicated instruments like the atomic absorption spectrophotometers and complex product lines like Contempra™ furniture are described briefly in this catalog. For complete details about these items and product lines, write or call your local Fisher sales representative, or use the convenient postcard located in this catalog immediately following the blue index pages. Simply check those items that interest you, mail the card to us, and we will send you our most current literature.

How We Ship

Where specific shipping instructions are lacking, the method of shipment employed will be based on the nature of the material, destination, and the size and weight of the package.

Air shipment will be made when requested. Packing is free for most domestic shipments. However, on some hazardous chemical shipments, a packing charge may be added to defray the costs incurred in meeting DOT regulations governing transport of hazardous materials.

Export shipments require special packing and cases, and on such shipments an extra charge is made to cover this cost.

Your order can be shipped FOB from 19 Fisher branches in the United States: Atlanta, Boston, Chicago, Cincinnati, Cleveland, Dallas, Detroit, Houston, Los Angeles, New York (Springfield, NJ), Orlando, Parkersburg, Philadelphia (King of Prussia, PA), Pittsburgh, Raleigh, Rochester, St. Louis, Washington (Silver Spring, MD); and 7 branches in Canada: Edmonton, Halifax, Montreal, Ottawa, Toronto (Don Mills), Vancouver and Winnipeg. In addition, the Fisher International Division has extensive facilities for overseas and other long-distance shipping.

Chemicals

Federal Department of Transportation regulations specify the manner in which many chemicals must be packaged for shipment. Your packing and shipping instructions for chemicals can therefore be complied with only insofar as DOT regulations permit. See the Chemical Index introduction (p 1248) for complete details.

Federal regulations require that, as of January 1, 1977, all hazardous materials classified as poisonous (liquids or solids, Class B) must bear the DOT poison label regardless of quantity. United Parcel Service is not permitted by law to transport poisonous materials. Therefore, this material will be shipped by motor freight, which incurs a higher freight charge.

Returned Goods Policy

Normal transaction of business inevitably requires the occasional return of merchandise for exchange or credit. Hence, we have designed a returned goods policy that not only expedites returns and exchanges, but allows us to fulfill each customer's particular needs. This policy also complies with FTC, FDA, DOT, ICC, and other applicable government regulations.

In case of damage or loss in transit

Immediately upon receipt of a Fisher shipment, carefully unpack it and inspect for shortages and damage. Do not accept damaged shipment until carrier's driver makes a "damage notation" on your delivery receipt or freight bill.

If a shortage or damage exists, you should immediately request that carrier's inspector make an inspection, or you should prepare an affidavit that you notified the carrier's inspector on a certain date and he failed to make the inspection if he does not comply with your request. Retain all containers and packing material for the inspection. (The inspection report is a mandatory part of the claim made on the carrier.) The carrier must be notified of concealed damage and an inspection requested within 15 days of delivery.

In case of product-related problems

If a problem develops concerning a newly-purchased Fisher product, please write or telephone your local Fisher branch within 10 days of its receipt. Our personnel will act to resolve the situation promptly.

Return authorization

To obtain credit for your return, prior written authorization is necessary. Return Authorization, Form 159, will be sent as your authority to make a return. It provides full instructions on how to pack and ship the return to your Fisher branch.

Please enclose the designated copy of this authorization form with the return shipment. Returns made without this form will not be accepted, but will be returned "collect" to the customer.

NOTE: Returns are subject to a restocking charge, but incurrence of this charge will depend on the particular circumstances necessitating the return.

Returns which cannot be authorized

1. Items (without a Fisher catalog number) purchased from an outside vendor for the convenience of the customer, unless Fisher can return them to the vendor for full credit.
2. Items not purchased from Fisher Scientific.
3. Products which exceed expiration dates.
4. Sealed reagents, diagnostics, or chemicals which have been opened (unless they do not meet specifications).
5. Products requiring refrigeration which have deteriorated for lack of refrigeration.
6. Products modified or mutilated from improper repairs, application of special identification labels or name plates.

Return of hazardous materials

Return shipments of hazardous materials must be packed in specification containers marked and labeled in accordance with DOT regulations governing transportation of hazardous materials. Shipping documents must also be pre-

pared to conform with applicable DOT regulations.

Financing Plans

Installment purchase plans for durable equipment of \$500 value or more are available.

For complete details of Fisher financing plans, or for a specific proposal to meet your individual needs, contact your Fisher representative or write: Marketing Director, Fisher Scientific Company, 711 Forbes Avenue, Pittsburgh, PA 15219.

Rental and Leasing Programs

Both rental and leasing agreements are available for purchase of capital equipment. Terms can be individually suited to the customer's needs. For further details, contact your local Fisher sales representative.

How We Price

Prices in this book are current at time of publication and are subject to change without notice.

We invite your inquiries and will promptly quote prices on different quantities of equipment and materials other than the standard units listed in this catalog.

Terms of Payment — Net 30 Days

If you do not have a Fisher charge account, send remittance with your order. Include estimated postage for parcel post, plus sales tax if applicable. For financing foreign orders, see p 1607.

Minimum Order

Small orders are costly for you and your supplier. Orders for less than \$25.00 are therefore subject to processing and handling charges.

Temperature Conversion Table

The numbers in light face in the center column refer to the temperature (either in Centigrade or Fahrenheit) to be converted to the other scale. If converting Fahrenheit to Centigrade, the Centigrade temperature will be found in the left column. If converting Centigrade to Fahrenheit, the Fahrenheit temperature will be found in the right column.

Stopper sizer

This table lets you quickly choose the correct rubber stopper to fit any regular-wall glass tubing from 12 to 100 mm OD, and any opening from 10 to 95 mm ID.

Stopper Size No.	Fits Tubes (mm OD)	or	Openings (mm ID)	Top Diameter
00	12 to 15		10 to 13	15
0	16 to 18		13 to 15	17
1	19 to 20		15 to 17	19
2	20 to 21		16 to 18.5	20
3	22 to 24		18 to 21	24
4	25 to 26		20 to 23	26
5	27 to 28		23 to 25	27
5½	28 to 29		25 to 26	29
6	29 to 30		26 to 27	32
6½	30 to 34		27 to 31.5	34
7	35 to 38		30 to 34	37
8	38 to 41		33 to 37	41
9	41 to 45		37 to 41	45
10	45 to 50		42 to 46	50
10½	48 to 51		45 to 47	53
11	52 to 56		48 to 51.5	56
11½	57 to 61		51 to 56	60
12	62 to 64		54 to 59	64

Partial List of Suppliers

Adjusto Equipment	Stools and Chairs
Ainsworth	Balances
All Pak Inc.	Bottles
American Monitor	Diagnostic Reagents
American Optical	Microscopes, Microtomes
Ames	Clinical Diagnostic Aids
Analtech	TLC Plates
Analytab Products	Bacteria Identification System
Analytical Chemists	Agarose Gel Electrophoresis Systems
Anderson 2000	Air Monitoring
ATM Corporation	Sonic Sifter

Bacharach	Gas Analyzers, Humidigraphs
Baltimore Biological Laboratories	Culture Media, Serological Reagents
Barnstead	Still and Sterilizers
Bausch & Lomb	Microscopes, Colorimeters, Spectrophotometers
Becton-Dickinson	Blood Collecting Tubes, Micro Pipets, Syringe Needles
Behring Diagnostics	Blood Bank Reagents
Bel Art	Plasticware
Bethlehem Apparatus	Glassblowing Aids
Biddle	Potentiometers
Bioware	Diagnostics/Electrophoresis
Blue M	Ovens and Incubators
Boekei	Alcohol Lamps
Brinkman	Circulators, Micro Pipetting Systems, Rotary Evaporators
Briscoe	Heating Tapes
Buchler Instrument	Electrophoresis Systems, Flash Evaporators
Buehler	Metallurgical Apparatus

Cahn	Electrobalance®
Calgon Corporation	Water Conditioner
Carver	Laboratory Presses
Castle Co.	Steam Sterilizers
Clay-Adams	Clinical Labware, Centrifuges
Coleman	Spectrophotometers
Cooke Engineering	Microtiter Systems, Disposable Plasticware
Coors	Porcelain Labware
Corning	Laboratory Glassware, pH Meters, Electrodes, Water Stills

Digimetric	Balances
Dow Corning	Stopcock Greases
Drummon Scientific	Microcaps
DuPont	Chemicals
Dymo	Tapewriters

Eagle Manufacturing	Safety Containers
Eastern Industries	Stirrers & Pumps
Eastman	Organic Chemicals
Eaton Dikeman	Filter Paper
Eberbach	Electrodeposition Apparatus, Shakers
Electrothermal Engineering	Heating Tapes
Elkay Products	Automatic Analyzer Supplies
Engelhard	Platinum Ware

Fairbanks Morse	Scales
Falcon Plastics	Disposable Plasticware
Fischer & Porter	Flowmeters

Gast	Air Pumps
Gelman	Electrophoresis, Membrane Filters
Glas-Col	Heating Mantles
Guth Products	Glass Specialties

Haake	Circulators & Water Baths
Hamilton	Syringes
Hellige	Color Comparators, Turbidimeters
Heuer	Timers, Stopwatches
H/F	Turbidimeters
Hoskins	Furnaces, Hot-Plates
Humbolt	Petroleum Testing Equipment
Hysel	Blood Chemistry Reagents & Test Sets

International Equipment	Centrifuges, Cryostats, Microtomes
-------------------------	------------------------------------

Jewett	Laboratory & Blood Bank Refrigerators, Freezers
--------	---

Johns-Manville	Chromatography Media
Justrite	Safety Products

Kay Labs	Shipping Containers
Kidde	Safety Products
Kimberly Clark	Wipers & Cleaning Tissues
Kimble	Laboratory Glass & Plastic Ware

LabConCo	Laboratory Carts, Fume Hoods
Labindustries	Pipettors
Lab-Tek	Tissue Processing Equipment
Lindberg/Hevi-Duty	Furnaces, Hot-Plates
Luft	Laboratory Controller

Mallinckrodt	Supports
Manostat	Plastic Valves & Pumps
Maryland Plastic	Animal Cages
Matheson, Coleman & Bell	Biological Stains
Mettler	Balances
Minnesota Mining & Mfg.	Tapes
MLA	Pipetting Devices

Nalge	Laboratory Plastic Ware
National Appliance	Ovens/Incubators
Norton	Tubing

Ohaus	Scales
Orion	pH Meters, Specific Ion Electrodes
Oxford Laboratories	Micro Pipetting & Column Chromatography Systems, Diagnostic Test Kits

Parr	Calorimeters & Pressure Reaction Equipment
Polyfoam Packers	Shipping Containers
Precision Sampling	Syringes
Precision Scientific	Ovens, Incubators, Water Baths
Professional Tape	Tape

Revco	Freezers
Roche Diagnostics	Bacteria Identification Systems

SAI Technology	ATP Photometer
Sargent-Welch	Pumps
Schleicher & Schuell	TLC/Chromatography
Scientific Industries	Gasometers
Scientific Mfg. Industries	TLC Supplies, Fracto Collector
Sherwood Medical	Disposable Plasticware
Smith, A.R.	Serological Serums
Spectrum Medical Lab	Dialysis Supplies
Staco	Transformers
Superior Electric	Variable Transformers
Sylvania	Serological Reagents

Taylor Industries	Thermometers
Techné	Circulators & Sand Baths
Thermolyne	Furnaces, Hot-Plates
Torsion	Balances
Turner	Fluorometers, Electrophoresis, Spectrophotometers
Tyler	Sieves

Ultra-Violet Products	Ultraviolet Lamps
Union Carbide	Graphite Electrodes
U.S. Stoneware	Tygon® Tubing

Virtis	Homogenizers
Voland	Balances
Vollrath	Stainless-Steel Labware

Wampole	Clinical Test Kits
Waring	Blenders
Warner-Chilcott	Biochemicals
Westinghouse	Hollow Cathode Lamps
Weston	Bimetallic Thermometers
Whatman	Filter Paper, Extraction Thimbles
Wilks	IR Supplies

Yellow Springs	Temperature Measuring Instruments & Controllers
----------------	---

Fisher Scientific Company Trademarks

Trademark	What It Identifies
Accumet®	pH meters
Airejector	filter pump
Alkacid®	pH test papers
Autemp®	electric hot plate
Automerse	immersion heater
Biology Reporter	Fisher publication
Bioprobe®	remote-reference combination electrode
Boileezers®	granules for boiling control
Cal-Ex	decalcifying solution
Castaloy®	laboratory clamps and holders
Celline	physiological saline
Cello-Grease	stopcock grease
Cello-Metal	instrument covers
Cello-Seal	stopcock grease
Cement-Stik	acid-proof cement
Chemi-Scraper	spatula
Chemister	containers for automatic chemistry solutions
Circustat®	bath heater, controller and circulator
Clearsorb	decolorizing agent
Combax®	combustion boats and accelerators
Conserv-Air®	fume hoods
Contempra	laboratory furniture
Count-all	automatic bacterial colony counter
CulturTek	pipets
CytoPrep	cytological fixative
Desicooler®	desiccator
Desiplate	desiccator plate
Digiglobin	automatic hemoglobinometer
Dilumat®	sampling, diluting and dispensing apparatus
Dri-Pak	dry-packaged electrodes
Duratek®	laboratory bench-top material
Dyna-Mix®	laboratory stirrer
EconoTemp	laboratory ovens
Electro-Hosecock	electrically operated clamp
Electrophotometer	photoelectric colorimeter
Environmental Reporter	Fisher publication
Enzytec	enzyme control
FL-70®	biodegradable detergent
Filtrator®	vacuum filtration device
FISHERbrand®	products made for Fisher Scientific Company
Recordall®	laboratory recorders
Flaminox	non-ionic detergent
Flexaframe®	laboratory frame supports
Flexa-Mix	magnetic stirrers
FormaldeFresh	odorless formaldehyde
Fultork®	laboratory motor
Funelaire	filtering aid

Trademark	What It Identifies
Gamal®	metallographic polishing accessories
Gram-Pac®	reagent packets
Handi-Hold	laboratory spatula
Handi-Swab®	cotton tipped swabs
Hemataill®	reagent system for blood cell counting
Hemophotometer®	instruments for measuring hemoglobin in blood
Histomatic	tissue processing apparatus
HiTemp	high temperature bath
Hot-Wire	electric glass cutter
Infra-Radiator®	infrared heaters
Isotemp®	temperature-controlling apparatus
Jet-Clean	laboratory glassware washer
Jet-Dri	laboratory glassware dryer
Kettle Klamps	reaction-kettle clamps
Lab-Larm®	fume hood pressure alarm
Lab/Lift	adjustable laboratory supports
Lab-Pack	set of analytical reagents
Lab Reporter®	Fisher publication
LecturSphere	container for laboratory gases
Med-Lab Reporter®	Fisher publication
Metab®	titration indicator tablets
Microprobe®	miniature combination electrode
Multi-Flame®	blast burner
Nonaq	stopcock grease
NutrAzide	neutralizing solution for sodium azide build-up in plumbing
Partitioner	gas chromatography apparatus
Penicylinders	penicillin assay tubes
Permas®	analytical balance weights
Permout	histological mounting medium
PolyPac	containers for storage and dispensing of solutions
Polytek	laboratory bench-top material
Pyseal®	sealing cement
Ready-Rack	laboratory support
Redi/Plate	thin layer chromatography plates
Restek	laboratory bench-top material
Revolva-Drawer	lazy susan lab furniture shelves
Rexyn®	ion-exchange materials
Ridox	reagent for removing oxygen from gases
Rota-Plate®	inoculating turntable
Rota-Mix®	rotator for mixing blood samples
Roto-Rack®	rotating mixer

Contd. next page

Trademark**What It Identifies**

Safety Flow	laboratory fume hoods
Saf-T-Pump	polyethylene liquid-dispensing pump
Safe-Cote	safety acid bottle
Safe-Tin	container for flammable solvents
Scimatco	laboratory appliances
Scintanalyzed	reagents for scintillation counting
ScintiDiox	dioxane base scintillation reagent
ScintiGest	tissue solubilizer for scintillation counting
ScintiLene	Xylene base scintillation reagent
ScintiPrep	concentrated scintillator/solvent mixtures
ScintiVerse	universal scintillation reagent
Scoopula®	stainless-steel dispensing implement
Sealit	sealing cement
Selecta-Jet®	blast burner
SepaRite	sampler tube
Sparkleen	glassware detergent
Spectranalyzed®	specially purified solvents for spectrophotometric analysis
Speedyvap®	glass beaker covers
Splashgon®	filter pump splash eliminator
Spoonula®	combination spoon and spatula
Spoonulet®	miniature spoon/spatula
Stedi-Speed	adjustable stirrer
Sub-Sieve Sizer	particle-size apparatus
Superflex	connectors
Tensiomat®	semi-automatic surface tensiometer
THAM®	precise temperature standards
Thermix®	magnetic stirrer/hot-plate
Tissue-Prep®	tissue embedding compound
Titralyzer®	automatic titrating apparatus
Titrimeter®	electrometric titration apparatus
Tri-G	reagent system for determining triglycerides in blood
Tru-Glu	glucose tolerance test beverages
Tuf-Temp	process for toughening glass

Trademark**What It Identifies**

Utili-Pump	polyethylene pump
Vari-Flow	pinchcock
Versa-Bath	bath heater and controller
Versamix®	magnetic stirrer
Versa-Table	modular laboratory table
Vibradamp®	analytical balance support
Vuemix®	lighted magnetic stirrer
Watch/Guard	stopwatch holder

Educational Materials Division Trademarks

Clear-Vue	educational embedments
Educational Reporter	Fisher publication
Fisher/Pak	perserved specimens
Fisher/Fresh	low odor preservative
Perma-Slant	cultures
Phyta-Clone	algae cultures
Visi-Plas	plastic embedments

GUARANTEE

The Fisher Scientific Company guarantees that each article which it furnishes will conform to the specification given in this book, or that of a further improved model.

Catalog 77

4126 new items added.
